**ADVICE LETTER 1833-G**  
(U902-G)

PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA

**SUBJECT: DECEMBER 2008 STANDBY PROCUREMENT RATE**

San Diego Gas & Electric Company (SDG&E) hereby transmits for filing changes in its gas tariff schedules, as shown on the enclosed Attachment A.

**PURPOSE**

This monthly filing revises Schedule G-IMB, Transportation Imbalance Service and the Preliminary Statement, Part II, Statement of Rates, to establish the Core Retail and Noncore Retail Standby Procurement Rates effective for the flow month of December 2008.

**BACKGROUND**

Effective February 11, 2003, the California Public Utilities Commission (Commission) approved SDG&E Advice Letter 1359-G which authorized SDG&E to file the Standby Procurement Rate, by separate advice letter, at least one day prior to the 25<sup>th</sup> of the following month.

The Commission authorized SDG&E to change its methodology for calculating its Standby Procurement Rate for negative monthly transportation imbalances that exceed the 10% tolerance band. The Standby Procurement Rate is:

1. Calculated at 150% of the highest daily border price index at the Southern California border for the period, plus the authorized Brokerage Fee of 0.188 cents per therm. The highest daily border price index is an average of the highest prices from "NGI's Daily Gas Price Index - Southern California Border Average" and "Gas Daily's Daily Price Survey - SoCal gas, Large pkgs Midpoint."
2. Calculated period begins on the first day of the "flow month"<sup>1</sup> and ends five days prior to the start of each corresponding imbalance-trading period.
3. Posted at least one day in advance of each corresponding imbalance-trading period.

---

<sup>1</sup> The flow month is the month that the imbalance is created.

Pursuant to SDG&E Advice Letter 1745-G<sup>2</sup>, SDG&E is also revising its tariffs to update the Standby Procurement Rate for noncore retail service. This rate is derived using the same Commission approved calculation methodology as the Standby Procurement Rate for core retail service and includes the noncore retail Brokerage Fee.

For the flow month of December 2008 (covering the period December 1, 2008 to January 20, 2009), the highest daily border price index at the Southern California border is \$0.60250 per therm. The resultant Standby Procurement Rate, based on the calculation methodology set forth above is \$0.90563 per therm for core retail service and \$0.90563 per therm for noncore retail service. The workpaper detailing the calculation of these rates is included herein as Attachment B.

This filing will not create any deviations from SDG&E's tariffs, cause withdrawal of service from any present customers, or impose any more or less restrictive conditions.

### **PROTEST**

Anyone may protest this Advice Letter to the California Public Utilities Commission. The protest must state the grounds upon which it is based, including such items as financial and service impact, and should be submitted expeditiously. The protest must be made in writing and must be received within 20 days of the date this Advice Letter was filed with the Commission. There is no restriction on who may file a protest. The address for mailing or delivering a protest to the Commission is:

CPUC Energy Division  
Attention: Tariff Unit  
505 Van Ness Avenue  
San Francisco, CA 94102

Copies of the protest should also be sent via e-mail to the attention of both Honesto Gatchalian (jnj@cpuc.ca.gov) and Maria Salinas ([mas@cpuc.ca.gov](mailto:mas@cpuc.ca.gov)) of the Energy Division. A copy of the protest should also be sent via both e-mail and facsimile to the address shown below on the same date it is mailed or delivered to the Commission.

E-mail: tcahill@SempraUtilities.com

### **EFFECTIVE DATE**

SDG&E believes this Advice Letter is subject to Energy Division disposition and should be classified as Tier 1 (effective pending disposition) pursuant to GO 96-B. SDG&E hereby requests that the tariffs filed herein become **effective January 22, 2009**, the date filed, in order to comply with SDG&E's tariff requirement that the rates be posted at least one day in advance of the start of the imbalance trading period, which is December 25, 2008.

---

<sup>2</sup> SDG&E AL 1745-G was approved by letter from the Energy Division dated March 3, 2008 and modified Schedule G-IMB to establish the noncore retail standby rate and brokerage fee. Modifications to Schedule G-IMB were approved effective April 1, 2008.

**NOTICE**

A copy of this filing has been served on the utilities and interested parties shown on the attached list by providing them a copy hereof either electronically or via the U.S. mail, properly stamped and addressed.

Address changes should be directed to SDG&E's Tariffs by facsimile at (858) 654-1788 or by e-mail at SDG&ETariffs@semprautilities.com.

TRANSPORTATION IMBALANCE SERVICE

RATES

Imbalance quantities remaining at the end of the designated imbalance trading period and which are outside of the 10% tolerance band will be billed at the Standby Procurement Charge or purchased by Utility at the Buy-Back Rate. Any Standby Procurement Charge or purchases at the Buy-Back Rate of core imbalances created by the Utility Gas Procurement Department will be managed within the Utility System Operator's Operational Hub Services. Such core imbalances will be disposed of with the net revenues from the core imbalance charges flowing back through the SoCalGas Noncore Fixed Cost Account (NFCA).

Standby Procurement Charge

This charge is applied to customer's cumulative negative transportation imbalance (confirmed transportation deliveries less actual usage) exceeding the 10 percent tolerance band. The Standby Procurement Charge is posted at least one day in advance of each corresponding imbalance trading period for noncore/wholesale and core transport agents (CTAs). It is calculated at 150% of the highest daily border price index at the Southern California Border beginning on the first day of the month that the imbalance is created to five days prior to the start of each corresponding imbalance trading period, plus the authorized Brokerage Fee of 0.188¢ per therm for noncore retail service and all wholesale service, and 0.188¢ per therm for core retail service. The highest daily border price index is an average of the highest prices from "NGI's Daily Gas Price Index Southern California Border Average" and "Gas Daily's Daily Price Survey SoCal gas, Large pkgs Midpoint".

**G-IMB Standby Procurement Rate Calculation**

The highest daily border price index is an average of the highest prices from "NGI's Daily Gas Price Index - Southern California Border Average" and "Gas Daily's Daily Price Survey - SoCal gas, large pkgs Midpoint."

The highest daily border price index for the period was on December 17, 2008

12/17/08 NGI's Daily Gas Price Index (NDGPI) = \$0.5990 per therm

12/17/08 Gas Daily's Daily Price Survey (GDDPS) = \$0.6060 per therm

Highest Daily Border Price Index (HDBPI) = (NDGPI + GDDPS) /2

HDBPI = \$0.60250 per therm

**Standby Procurement Rate (Core Retail) = 150% x HDBPI + Core Brokerage Fee**

$$150\% \quad \times \quad \mathbf{0.60250} \quad + \quad 0.00188 \quad = \quad \mathbf{0.90563}$$
