ADVICE LETTER 2018-E
(U902-E)

PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA

**SUBJECT: REVISIONS TO ELECTRIC TRANSMISSION RATES EFFECTIVE
SEPTEMBER 1, 2008**

San Diego Gas & Electric Company (SDG&E) hereby submits for approval the following revisions to its electric tariffs as shown in the enclosed Attachment B.

PURPOSE

This filing revises SDG&E's electric transmission rates effective September 1, 2008 through August 31, 2009, pursuant to its Transmission Formula Rate Mechanism for its TO3 Cycle 2 filing, which was filed with the Federal Energy Regulatory Commission (FERC) on August 14, 2008.

BACKGROUND

Pursuant to SDG&E's FERC-approved transmission formula and in accordance with the FERC-approved Settlement¹, on June 15, 2008 SDG&E posted a draft of the TO3 Cycle 2 Informational Filing on its website for review and comment by interested parties, including the California Public Utilities Commission (Commission). On August 14, 2008 SDG&E filed with FERC its annual Transmission Rate Filing (Cycle 2) to adjust its Base Transmission Revenue Requirements (BTRR) for end use customers and wholesale customers, effective September 1, 2008. This filing allows SDG&E to collect only the transmission related expenses it incurs at an allowed return on equity equal to 11.35%. SDG&E's annual BTRR will increase by \$85 million to \$297 million for the 12-month effective period ending August 31, 2009.

Commission Resolution E-3930, approved on May 26, 2005, established a new process for review by the Commission of FERC-jurisdictional rate changes. Page 7 of the Resolution states the following:

"The Commission recognizes that under the filed rate doctrine, the Commission should allow a pass through of these transmission rates that are filed with and become effective at the FERC".

¹ SDG&E filed the TO3 Settlement on March 27, 2007 in Docket Nos. ER07-284-000, *et al.* On May 18, 2007, the FERC approved the Settlement in *San Diego Gas & Electric Company*, 119 FERC ¶61,169 (2007).

Therefore, in compliance with the process outlined in Resolution E-3930, SDG&E is filing to revise its electric transmission rates effective September 1, 2008, subject to refund, concurrent with the date they become effective at the FERC.

Consequently, this Advice Letter implements the above-described changes in SDG&E's electric rates commencing September 1, 2008. Consistent with D.04-02-057, total (commodity plus non-commodity) residential electric rates for usage up to 130% of baseline remain unchanged. SDG&E's total system average electric rates will increase by approximately 0.400 cents/kWh or 2.77%. This update will occur in combination with the electric rate adjustments filed in SDG&E AL 2015-E/1792-G, which implements the revenue requirements approved in SDG&E's Phase I 2008 General Rate Case (GRC) Decision, D.08-07-046.

A table summarizing the rate impacts by customer class for both the transmission only rate adjustment (proposed in this Advice Letter) and the overall rate adjustment that will occur on September 1, 2008, is included herein as attachment A.

EFFECTIVE DATE

SDG&E believes that this filing is subject to Energy Division disposition and should be classified as Tier 1 (effective pending disposition) pursuant to GO 96-B. SDG&E respectfully requests that this filing become effective on September 1, 2008, subject to review by the Commission's Energy Division.

SCHEDULE S
STANDBY SERVICE

Sheet 1

APPLICABILITY

Applicable for service to any customer with an electric generator that is operated in parallel with the Utility. If another Rate Schedule provides for applicable service to the customer as an option, then this Rate Schedule will become an option to that customer. The service provided on this Rate Schedule is standby or breakdown service where all or part of the customer's electrical requirements are supplied by a generation source, other than the Utility, which is located on the customer's premises. This schedule is not applicable to customers who have chosen, in the generation agreement, to sell power to the Utility on a simultaneous purchase and sale basis. Pursuant to Resolution E-3779, effective May 22, 2001, a customer may be eligible for Schedule DR-TOU-DER or AL-TOU-DER.

Solar Customers who are taking service under the Utility's Net Energy Metering tariff are exempt from standby charges. In addition, Solar Customers which are less than or equal to one megawatt to serve load and who do not sell power or make more than incidental export of power into the Utility's power grid are also exempt from standby charges. Non solar customers taking service under one of SDG&E's Net Energy Metering schedules may be exempt from standby charges pursuant to PU Code Section 2827.

TERRITORY

Within the entire territory served by the Utility.

SCHEDULE UM

Sheet 1

UNMETERED ELECTRIC SERVICE

APPLICABILITY

Applicable to unmetered service of industries that require single-phase bundled electric service to operate devices that may be mounted on existing Utility facilities, or other facilities approved by the Utility and are unmetered. Where the Utility determines it is impractical to provide single-phase service under this Schedule, three-phase service will be provided. Customers must execute a contract with the Utility for service under this Schedule, and must execute a Pole Attachment Agreement when devices are attached to Utility-owned facilities.
